## NS-200PS (PoE Splitter)

## Introduction:

The NS-200PS plays the role of PD, and splits the data signal and power signal that are transmitted from the PSE. The NS200PS plays a dual role of providing power to industrial devices, and enabling Ethernet connections.

| Models | NS-200PS |
| :---: | :---: |
| Technology |  |
| Standards | IEEE 802.3, 802.3u, 802.3x ,802.3af (Power over Ethernet) |
| PoE Input |  |
| IEEE 802.3af PoE operation | Powered Device (PD) |
| PoE Power input range | +46~54 VDC |
| PoE power input | Automatic detection and classification (power is accepted on either the signal or unused pairs) |
| Power Output |  |
| Voltage output | 24 VDC, 0.42 Amps |
| Power output | 10 watts |
| Cable length |  |
| The specified maximum length of cable allowed between the PoE Switch and Ethernet device should be 100 meters or approximately 300 feet. The NS-200PS is not a repeater and does not amplify the Ethernet data signal. Figure 1 illustrates the maximum length of cable. |  |
| Mechanical |  |
| Casing | Plastic (Flammability UL 94V-0) |
| Dimensions (W x L x H) | $33 \mathrm{~mm} \times 78 \mathrm{~mm} \times 107 \mathrm{~mm}$ |
| Installation | DIN-Rail |
| Environmental |  |
| Operating Temperature | $-40^{\circ} \mathrm{C} \sim+75^{\circ} \mathrm{C}$ |
| Storage Temperature | $-40^{\circ} \mathrm{C} \sim+85^{\circ} \mathrm{C}$ |
| Ambient Relative <br> Humidity  | 10\% ~ 90\% RH, non-condensing |

LED Indicator Functions:

| LED | Color | Description |
| :--- | :--- | :--- |
| PWR | Red On | Power Output is On |
|  | Red Off | Power Output is Off |

Pin Function for Terminal Block:
+24V Output: Power Output (+24 VDC); GND: Ground
F.G.: F.G. stands for Frame Ground (protective ground). It is optional. If you use this pin, it can reduce EMI radiation; improve EMI performance and ESD protection.

## Applications:

Figure 1. illustrates the maximum length of cable.
