Rack Mount Chassis

FiberPlex RMC-2100 19" 2U rack mount chassis for FOI series units

FiberPlex

The RMC-2101 is a 2U, 9-Slot, Rear Loading Rack Chassis for mounting FOI Models

Overview

The RMC-2101 provides up to nine available slots for mounting FOI devices. Slot 10 must be occupied by a PSM-2010 power supply module which is included with the chassis. An optional second PSM-2010 can be added for power redundancy, leaving eight available slots for FOI devices.

A cable bay is provided for cable routing and enhanced air flow through two front exhaust fans. Each FOI device must also be accompanied by a CMA-2001 chassis mount adapter, which slides the fiber optic isolator into the slot and assures correct alignment of the isolator power connector to the power bus inside the RMC-2101. For TEMPEST or other high security applications, Patton recommends the RMC-2101R.

Features

- Up to 9 FOI units can be mounted inside this chassis
- Each FOI device is easily accessible from the rear of the chassis
- Enhanced cooling is performed using two exhaust fans mounted in the front of the chassis
- Power redundancy is available through an optional second power supply module.
- Options for TEMPEST grade RFI power filtering available

Applications

Model RP-2

Optional mission-critical bolt-on solution for the 2U chassis. The all aluminum case creates a completely enclosed chassis with integrated breakout connectors. Two simple thumb screws allow for easy removal of the case for hot swapping power supplies or FOI modules.
